economical . . . Every us farmers have never given our children many of the good things of this life and they know that we have not. We cannot hope to keep the son on the farm as long as he feels that young men at other places are having a better chance at life than he is having. We must make money ourselves and must also help the son to make some money. The young man must be taught to know that he can live and live well on the farm if he is to stay there. These things can be done and will be done some day. I long to see the day when each son will clamor for the old home place and all the children will seek to settle around the old homestead and be proud of their Chevrolet owner knows it's more economical . . . And every person will readily understand these why it is more economical

Every test proves it's more The Chevrolet engine is the most economical automobile engine produced today, because (1) it is a six-cylinder engine, and (2) it is a valve-in-head six-cylinder engine. . Its six cylinders use less gas and oil-in fact, use the least gas and oil-because six cylinders are the most conomical combination used in modern automobiles. . Its valve-in-head design cuts gasoline consumption still lower because there is less loss of heat through the walls of the combustion chamber in valve-in-head engines, and the advanced construction of the Chevrolet engine gives maximum heat (or power) saving.... Most important of all, Chevrolet's more efficient cooling system, pressure simple A-B-C reasons stream oiling and the greater accessibility of all working parts result in more dependable operation, over a longer period of time, with the lowest maintenance costs

ing the debt secured by said NEW PERFECTED HYDRAULIC BRAKES . mortgage, together with expenses of sale, including a reasonable atterney's fee.
